

NEW

Recyclable EPE Ring Seals

Introducing our new eco-friendly ring seal range that is fully recyclable.

These new ring seals are made from expanded polyethylene (EPE) that is 100% recyclable. The seals are specially designed to fit inside our 56mm and 60 mm Industrial Closures, made from the same base polymer.

There is no need to remove the ring seal before recycling the closure, as the two components can now be recycled together. Our new eco-friendly ring seal range is not only better for the environment, it is also more resistant to, and compatible with a broader spectrum of chemicals than regular ring seals made from nitrile grey or EPDM black rubber.

Recyclable EPE Ring Seals

56 mm Ring Seal

- Diameter: 43.3 mm x 45.8 mm
- Fits 56 mm Industrial Closure
- Code: B0421

60 mm Ring Seal

- Diameter: 55.4 mm x 47.8 mm
- Fits 60 mm Industrial Closure
- Code: B0426

Key Benefits:

- 100% Recyclable
- Food compliant
- Reduced carbon footprint
- Superior chemical resistance

Specifications:

- Seal Material: Agility EC700 Performance LDPE (Low Density Polyethylene)
- Seal Thickness: 3mm \pm 0.15 mm
- Foam density: 300 kg/m³
- General Chemical resistance: *Most acids, alkalis, salt solutions, water, alcohol and oil*
