

Lubricant Packaging Solutions

Lubripack specialises in the design and manufacture of rigid plastic containers and closures for the lubricant industry. Application includes motor oil, anti-freeze, engine cleaner and transmission fluids. Our extensive distribution network across Southern Africa ensures service excellence.

Customised Solutions:

We partner with our Design First division to offer expert assistance with packaging research, development and design to create highly customised solutions.

New design concepts are transitioned seamlessly to first production by partnering with our in-house mould manufacturing division, Mould Services.

We also work closely with customer-specific moulds from international mould suppliers.

Quality Assurance:

Our extrusion blow-moulding plant in New Germany, Kwa-Zulu Natal is ISO 9001 compliant to guarantee top quality containers of the highest international standard.

Our advanced full electric machines feature sophisticated on line leak testing and camera recognition technology. This is backed up by our modern QA laboratory with state-of-the-art testing equipment for optimal quality assurance.

Decoration:

- In-Mould Labelling (IML)
- Self-Adhesive Labelling

Matching Closures:

We offer the complete packaging solution with matching closures for all packs manufactured including Heat Induction Seals (HIS) if required.

Under 5 L Range:

Available in 200 ml, 500 ml, 1 L & 5 L.

Drum Range:

Available in 10 L, 20 L & 25 L.

UN Approved Drums Available.
